Lw

Dear Jim, OPR inventory 2/14/78

I am making extra copies of Volume VI because of a few things Lil called to my attention while she is copying it.

It contains proof that the FBI did, too, have separate from Murkin files to be searched, no matter how much they lied to me in your presence about this. This for sure is proof of one I specifically asked them to search. It did exist. In fact it survived wholesale destruction - Hoover's file!

There is a separate "June" mail file of King's mail.

There are references to other MURKIN files I have not received.

There is a list of the FBI's MURKIN files I did receive. As I flipped a few pages I notice that there may be some OPR notes. Lil will go through Volume I and make a copy of each added OPR note.

Need I point out that any review and any search had to disclose these things - and I'm sure others I'll find? (If we do not run out of paper I'll take this with me on the bus in the morning and annotate a copy Lil is making so I can.)

I do remind you of what I think are many (mis)representations made to Judge Green, of affidavits filed and on hand for DJ to file- the kind they think they threaten me by telling me they have.

I believe this is so gross, so deliberate and so much an offense to the court that I write this as a reminder for after you see what I will give you on this, so you can decide whether we should ask to see Green privately and give her copies.

It may have similar importances in 0692, where there is a judge who is much more likely to express himself on questions of misrepresentation. For this you'll have to go over the lists yourself because I'm not certain of what is included. If you can let me know perhaps I can do it for you.

Best,
